

The Internet should remain neutral. The free flow of information gives small businesses a chance to exist and grow amidst the competition of big corporates and monopolies. Net neutrality protects the consumer from price gouging and content manipulation. It protects us all against censorship, giving Americans voices of which the government or telecoms cannot pick and choose which ones are heard. Net neutrality protects innovation.

As the owner of a small business that designs and hosts websites, I strongly oppose the repeal of net neutrality rules. I support the oversight of ISPs as outlined in the current “light-touch” regulations of Title II of the Communications Act.

Regards,

Doug Secord
